THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

**DETAILED ACTION**

***Examiner's Note***

1. It should be noted that the rejection under 35 U.S.C. 101 applied to claims 11-14 and 16 has been withdrawn. The claimed "analysis means" and the "modeling means" are considered to be embodied in one physical component, such as a digital signal processor (DSP). Also, in a different embodiment the "analysis means" is considered to be the program code corresponding to the "analysis means" including the memory (memory 104), and the "modeling means" is considered to be the program code corresponding to the "modeling means" including the memory (memory 104), such code being operated on by a CPU (CPU 102). Please see the Specification of the Instant Application, Page 6 Lines 24-29 and Page 7 Lines 1-2.

***Terminal Disclaimer***

2. The terminal disclaimer filed on 3/28/08 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent No. 7,095,813 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Reasons for Allowance***

3. Claims 1-4, 6-14, 16-20 and 22-25 are allowed.

4. The following is an examiner's statement of reasons for allowance:

While Freiberg et al. (EP1089452) discloses determining correlation levels at predetermined points in time and determining a maximum signal level and Kohli et al. (U.S. Pub 2002/0015439) discloses an offset time. None of these references taken either alone or in combination with the prior art of record discloses a system/method to determine signal time of arrival in a wireless communication system, including:

(claim 1, 11) "a modeling processor/means configured to generate a second order polynomial mathematical model of a predetermined response function using the maximum signal level at the selected one of the predetermined points in time and correlation signal levels from predetermined points in time adjacent the selected one of the predetermined points in time; configured to determine a time associated with a peak correlation signal level based on the mathematical model, and further configured to determine a time of arrival of the received signals based on the time associated with the peak correlation signal level, an offset time encoded in the received signals, the mathematical model, and an iterative algorithm that avoids a division operation",

(claim 10, 16) "a modeling processor/means configured to generate an nth order polynomial mathematical model, n being greater than two, of a predetermined response function based on the maximum signal level at the selected one of the predetermined points in time and correlation signal levels from predetermined points in time adjacent the selected one of the predetermined points in time; configured to determine a time

associated with a peak correlation signal level based on the mathematical model, and further configured to determine a time of arrival of the received signals based on at least the time associated with the peak correlation signal",

(claim 17) "generating a second order polynomial mathematical model of a predetermined response function using the maximum signal level at the selected one of the predetermined points in time and correlation signal levels from predetermined points in time adjacent the selected one of the predetermined points in time; determining a time associated with a peak correlation signal level based on the mathematical model; determining an offset time encoded within the received signals, the offset time identifying a source of the received signal; and further determining a time of arrival of the received signals based on the time associated with the peak correlation signal level, the offset time, the mathematical model, and an iterative algorithm that avoids a division operation", and

(claim 23) "determining an nth order mathematical model, n being greater than two, of a predetermined response function using the maximum signal level at the selected one of the predetermined points in time and correlation signal levels from predetermined points in time adjacent the selected one of the predetermined points in time; determining a time associated with a peak correlation signal level based on the mathematical model; and further determining a time of arrival of the received signals based on the time associated with the peak correlation signal level",

in combination with remaining elements and features of the claimed invention. It is for these reasons that the applicant's invention defines over the prior art of record.

***Conclusion***

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Ortiz-Rodriguez whose telephone number is 571-272-3766.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Rodriguez can be reached on 571-272-3753. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
